Mercurius Anglicanus,

OR THE

Englisſh Mercury:

Being a Double

EPHEMERIS

For the Year of our Lord, 1692.

Heliocentrical & Geocentrical,

Or the Planets places and Aſpects referred both to the *Sun* and *Earth*; exactly calculated from

ASTRONOMIA CAROLINA,

For the *Meridian* of the famous City of *London*, whoſe Latitude is 51° 32', but generally uſeful to *England*, *Scotland*, and *Ireland*, &c.

With Monthly Predictions thereon.

Likewiſe a correct Table ſhewing the Time of High Water at *London* Bridge, both Morning and Afternoon; in a very plain Method.

Being the *Biſſextile*, or Leap-Year.

The like not extant in any other.

By *GEORGE PARKER*, a Lover of the Cœleſtial Sciences.

London, Printed by *J. M.* for the Company of STATIONERS, 1692.

A Table of the true Places of the chiefeſt fixed Stars, near the Ecliptick, for the Year 1692.

TO THE
SONS of ART
In the Kingdoms of
England, Scotland and *Ireland.*

Gentlemen,

WE have a third time presented you with an Ephemeris, it being for the Year 1692, the Calculation whereof is very laborious: and our vacant hours so few, that it was hard for us to make our appearance in publick this Year; but we are much obliged to several of our very good Friends, who readily contributed to our Assistance; as in particular to that incomparable Astronomer Mr. John Flamsteed, who generously sent us the times of the Moons coming to South with a correct Table of the Tides at London-Bridge.

And for a further embellishment of our Work, was pleased to communicate to us three others which we perswade our self will not be unacceptable.

The first is a Table of the Æquation of Natural Days, which shews how much the mean time, or that shewed by a true made and regulated Pendulum Clock, is more or less than the time found by celestial Observation, or an accurate Sun-Dial; whereby such Gentlemen as are furnished with good Clocks, will find what allowances to make for their Errors.

Another, is a Table of the Sun's true declination to every day in the Year, for the use of our Seamen, those in the old and common Kalenders being derived from faulty Tables, these from such as agree with the latest accurate Observations; these (God willing) shall be repeated the three following Years, and with the last, a Table whereby they may be made to serve a whole Age.

A third, is a Table of the true times of the Eclipses of Jupiter's Satellites under the Meridian of the Observatory, or of their Immersions into his shadow and Emersions from it visible in our Horizon: These by the consent of those who are acquainted with them; and the way of Observing them, are the best expedient for determining the difference of Longitude of distant places; they are calculated from the same Tables with those ample Catalogues published in the Philosophical Transactions for the Years 1683,84,85,86,87. and to those Transactions, particularly that for the Month of December, 1685. Numb. 177. we refer the Reader who desires to be further informed of them and their use. If these find acceptance, such a large Catalogue of all the Eclipses of the Year as is there published, may be inserted in our next Years Ephemeris.

Likewise that worthy Gentleman, and without flattery, we may say, Filius Cœli, or true born Son of the Astral Sciences, Mr. Edmund Hally, whose early studies arrived to that perfection, that in the 21 Year of his age, he made a Voyage to the Island of St. Helena, to make Observations of the Southern Constellations; this eminent Artist to whom we no sooner communicated our unpreparedness; but as readily accepted, and in short time gave us the Eclipses for the present Year. The favour that these Sons of Minerva have been pleased to honour us withal, we hereby acknowledge and return them our humble Thanks.

The remaining part we hope, will be kindly entertained by you; as for the Calculations we have taken all the Care imaginable, that it may be without Error; respect being had to the Tables it is produced from (yet the best extant) and if there be any other, know it proceeds from the frailty that all mankind is liable to, for which we expect your favourable Censure.

We have inserted the Heliocentrick places with their Aspects in the same form and manner we did the last Year; and were their effects but carefully heeded, we do not doubt but they would soon speak for themselves, and that not only in the mutation of the Air, of which we own we have made great use in our Judgment and that not without success, but also in other positions as well as in directions, of which we have met with several notable Remarks in diverse observed Genitures, which have not been discovered by a Geocentrick Direction.

But

But if any object against the novelty of these Notions, and decry them in regard they are new, and will suffer nothing to pass current, but what hath got the stamp of Antiquity; then Arts and Sciences had never arrived to that perfection, which we see they are now brought to; for instance, Kepler that Phœnix of Astronomy by help of Tycho's accurate Observations first discovered the Planets to move Elliptical; also Galilæus his rare invention of the Telescope, by which he discerned the Planets moving upon their own Axis, with their Attendants or Satellites about them; also Mr. Street in his Astronomia Carolina makes the Aphelions of the Planets to be fixt, a thing at first rejected, but now generally approved by the ablest Astronomers of our age: And amongst the rest of these rare Inventions let us make mention of that ingenious Mechanick Mr. Samuel Watson Watchmaker in Coventry, who by his profound Skill and excellent Judgment in Horological Movements, hath produced so rare a Celestial Machine or piece of Clock-work, that it fairly represents the places of all the Planets in the Heavens with their middle Motions and Nodes, the Retrogradations and Elongations, the various Phases of the Moon, the Eclipses of the Luminaries, with their quantities, duration, and parts of the Earth they are visible in; with several other Curiosities too large here to mention, and this so plain and natural that her Majesty of Great Britain is pleased to entertain it amongst the rest of her Rarities in her own Closet. And altho' we do not pretend to compare these our Heliocentrick Directions with their famous Discoveries: Yet having found a truth in them, and that they may be serviceable to the Sons of Urania; we therefore recommend them with these our Astronomical Labours to your more serious perusal: And in the mean while we shall make it our study to be

Leopard in *Newgate Street*, *London*, *Nov.* 10. 1691.

Your Friend and Servant,

George Parker.

THE PROEM.

WE did in our laſt Year's *Mercurius*, by way of Introduction to our Diſcourſe, endeavour to ſhew how weak a Baſis or Foundation, the Scheme of a Vernal Ingreſs is for to raiſe ſo large a ſtructure thereon, as many have pretended to; by foretelling what Accidents and Caſualties, or offering a determinate Judgment on that Year's Revolution, notwithſtanding the Opinion of many of the Ancients in that Point. For we do not think our ſelf obliged any longer to keep them company, when they begin to ſteer amiſs, and not to make their readieſt Courſe to the deſired Haven of Truth; or to follow their ſteps which may lead one into the mire: when he may arrive at fair *Urania*'s Palace by a far cleaner way. Neither would we have any take advantage hereby, (as many are apt to do) and think there is nothing in Aſtrology; or that it is a Whimſie of the Brain, a meer Deluſion or Cheat, fit only for Fools or Madmen: No, Aſtrology hath had in all Ages of the World its Votaries, and will ſtill, notwithſtanding all its Oppoſers. *Experientia docet* is an old Phraſe, and is more convincing than a Thouſand Detracters moſt ſubtil Arguments againſt it; and for a Proof of the Truth thereof, many notable Predictions have been publiſhed to the world, which have been exactly verified in their due Courſe of Time, of which we ſhall give two Inſtances, yet not from the Poſitions of a Vernal Figure, *viz.* Mr *Edlin* in his *Præ-Nuncius Syderius* upon the ☌ of ♄ and ♅ in the Year 1663. and printed 1664. hath many notable Hints concerning the City of *London*; and in his Concluſion to the ſaid Diſcourſe delivers theſe plain words; *I have* (ſaith he) *in ſeveral places hinted; and have great Cauſe to fear; do therefore once again premoniſh you of a great Plague in the Year* 1665. *and pray God divert it.* In like manner the Famous

Mr

Mr *William Lilly* in his *Anglicus* for the Year 1677, ſpeaking on the ☌ of ♄ and ♅ then approaching in the Years 1682, and 1683. delivers theſe ſignificant Expreſſions; "Then Plots, "Treaſons, Conſultations, Treachery of Subjects againſt their Su"periours, are plotting, contriving or acting ſome years be"fore this Conjunction is celebrated. Thoſe pretending to Re"ligion, or ſuch as are famous for ſeditious Hereſies, or of dif"ferent Judgments from the Profeſſion of that Religion which "is eſtabliſhed by Authority, will for ſome years grumble for "the Reſtriction of their Conſciences (as they will term it) "and the nearer to the time of the Conjunction, the more Con"federates they will have: and either near unto the Conjun"ction it ſelf, or a little after; we fear greater Diſturbance of "thoſe Nations and the Princes they live under; diſquieting "the Governours; this for Conſcience ſake as they pretend. "But in ſome Nation Breach of the peoples juſt Priviledges, "ancient Cuſtoms, and former enjoyed Rights, will animate "the generality to a ſtrong and ſturdy Rebellion, & countenance "the Tranſlation of Monarchy mentioned by *Trithemius*. Now let any intelligible Perſon but conſider the Tranſactions that have occurred in this our Nation of *England*, for the laſt two ſeven Years, and compare them with the aforeſaid Predictions, and he will find almoſt every particular to be exactly verified: As well as the never-to-be-forgotten Year of 1665. wherein near 100000 Souls periſhed by that devouring Plague that then reigned, ſo exactly foretold by Mr *Edlin*.

And then in that highly and above all to be valued the Genethliacal Part of Aſtrology a numerous Crowd of Witneſſes might be brought to give their teſtimonies of what they have felt and experienc'd of the truth of it. Nay, we our ſelves can ſenſibly declare from the Poſition in our own Radix, the Effects of a fortified and angular Lord of the Seventh, oppoſing the Lord of the Horoſcope in the like Dignities; it is well known what the Seventh Houſe comprehends: And in the Doctrine of Directions can lately with too much experience declare the Verity thereof, from the Conſequence attending the ☽'s Direction to the □ of ♀. The Moon, you know (for now we are ſpeaking

to

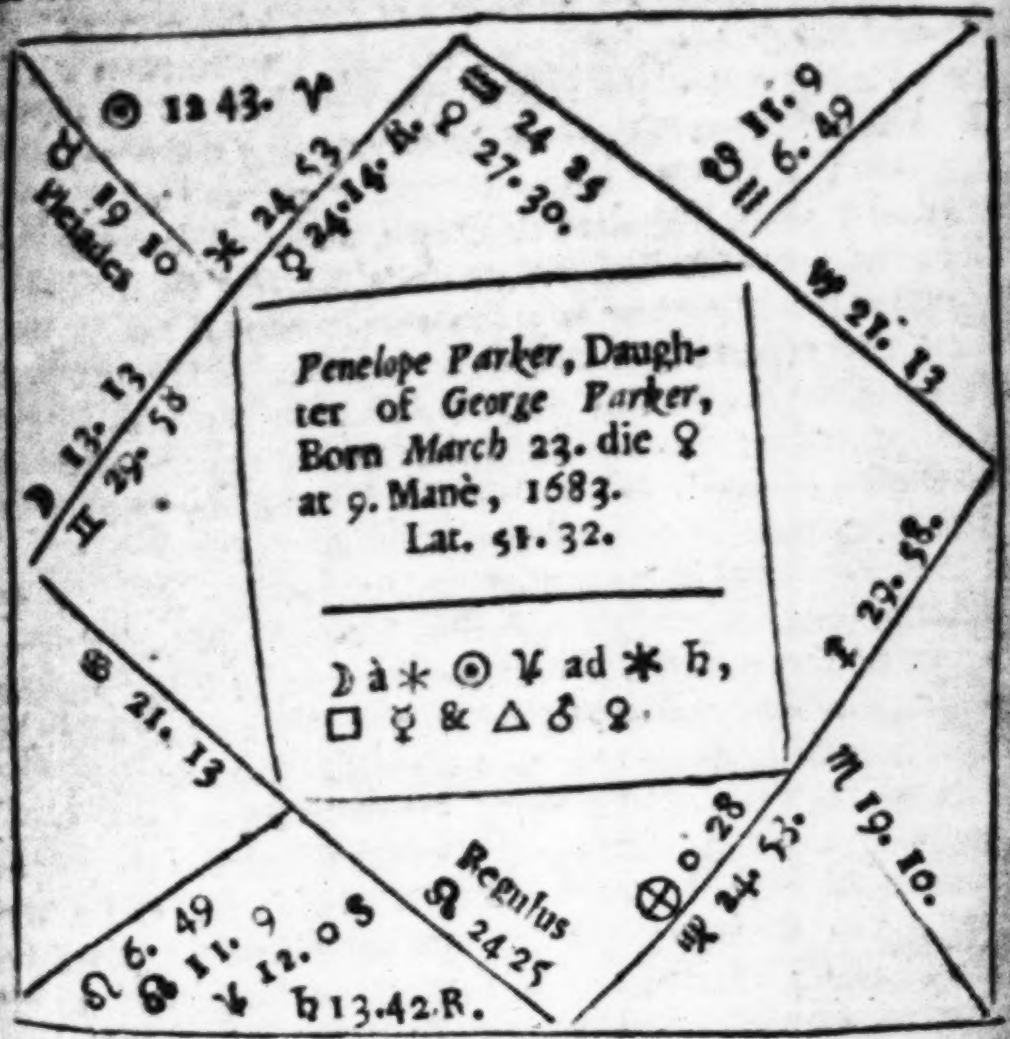

to *Artists*) what she is the general Significatrix of: to the ☐ of ☿ as easily declares the nature of the Affliction; for if malevolent Aspects to ☿ produce Theits, Lies, and Slanders in the Macrocosm, or great World; then it is reasonable to think that malevolent Directions to ☿ in any Radix may have the like Effects in the Microcosm, or little World; which we have found to our Detriment.

And now we are speaking of the Effects of Directions, and having often commended the efficacy of Heliocentrick Aspects, we will for the benefit of the *Sons* of *Art*, discover a secret not yet known to the world, viz. *We esteem the earth a principal Hylegiacal and to be directed in all Nativities as well as any other Star or Body.* And for a proof of what we assert, we will give one example that we have among many others, which was by our self carefully observed on a large Sun-dial, then newly made by Mr. *Brown* an able *Mathematician* in the *Minories, London*; and therefore can admit of very small error in time upon Correction.

This Native aged 4 Years and 10 Months, had the *Small-Pox* in a violent and extream manner; now let any of our Astrologers tell what direction it was that gave this fit of sickness; if they can tell none, which I am morally sure they cannot, for the time of Birth must be kept to (or at most within a minute or two) then will our Heliocentrick Direction of the ☉ to the ☌ of ♂, hit the time to a Miracle; for the direction touches *December* 20. 1687. and within less than a Month after the sickness initiated. I would have performed the Operation at large to have shewn how another may do the like: But the prejudice of some Person or Persons is such, that they love nothing but what is hammer'd on their own Anvils: And therefore we shall forbear at present any further explanation, as likewise our Discourse of Heliocentrick Aspects promised the last Year. And see how this is received amongst the *Sons* of *Art*. Yet if any Person is desirous to know the way of Operation, let them apply themselves to us, and we shall be willing not only in this, but in any other part that we can be serviceable to them, to shew our self their Servant. Some may perhaps think we insert this in a Bravado, or that we are minded to have the world

think

think we know more than others: We profess solemnly it is not our thoughts; we desire to have a mean opinion of our selves, well knowing that it is most agreeable to the command of our Lord and Saviour so to do, whose will we desire to follow, and it is our love to truth that caused it to be here inserted.

Of the Eclipſes for the Year 1692.

OF five *Eclipſes* which this Year affords, only part of one of them happens to be viſible at *London*: However, for the ſakes of thoſe that may chance to ſail in remote parts and ſee them; here is added the general computation of them all.

I. The firſt is an Eclipſe of the Moon, on *January* 23, in the Afternoon; it begins 34 minutes paſt noon, and ends 35 minutes paſt 3 in the Meridian of *London*, and therefore cannot be ſeen here; but more Eaſterly, as in *Poland*, *Hungary*, *Turkey*, &c. The end may be ſeen after the Moon riſes, and in the Weſtern and Northern parts of *America*, the beginning may be ſeen in the ſetting Moon; but all over *Aſia* and the *Mardelzur*, it will be viſible, and the quantity ſomewhat more than 10 Digits from the South.

II. The ſecond is an Eclipſe of the Sun, on *February* 7th day in the morning, not to be ſeen at *London*, but total in *Aſia*, which the ſhadow traverſes wholly, ſo that ſcarce any part of that vaſt quarter of the *World*, but may ſee it more or leſs, in *Ruſſia*, *Crimea*, *Anatolia*, *Cyprus* and *Egypt*, the Sun riſes more or leſs Eclipſed; and in *Meſopotamia*, the total ſhadow enters on the Earth, whence paſſing Eaſtward through *Perſia*, it at length turns to the North, and going on between *China* and the *Caſpian* Sea, it enters the vaſt unknown deſerts of *Tartary*, and thence leaves the Earth near the *Pole*. In reſpect of the parallel of *London*, twenty ſeven and half degrees of Longitude to the Eaſtwards thereof, the Eclipſe ends at Sun riſing, and therefore no part thereof can be ſeen more Weſterly, ſixty one degrees Eaſt; the Eclipſe begins at Sun riſing, and from thence begins to be all viſible; about ninety degrees to the Eaſt, total ſhadow paſſes the parallel of *London*, 149 degrees Eaſt, the Sun ſets at the end of the Eclipſe, and at 172 degrees Eaſt, it begins at Sun ſetting, and is therefore no farther viſible in the Latitude of *London*.

III. The

III. The third is an Eclipſe of the Moon, on *July* 18 in the morning, the greateſt part of which may be ſeen at *London*; it begins 29 minutes after one, and ends 53 minutes after 4; It will be about 11 Digits, Eclipſed on the North ſide, and may be ſeen in part to the Weſtern Regions of *Europe* and *Africa*, and all over *America*.

IV. The fourth is an Eclipſe of the Sun, on *Auguſt* 2d in the morning, not viſible to any part of *Europe*; the total ſhadow enters on the Earth about 10 degrees of Longitude to the Eaſtward of *Rio de la Plata*, and from thence cruſing the *Æthiopick* Ocean in the Latitude of about 33 degree South, it will be very great at the *Cape* of *Good Hope*, and from thence tending into the South-Eaſt, leaves the known parts of the world. The Sun will riſe Eclipſed along the Coaſt of *Braſil*, and the partile Eclipſe reaches the Coaſt of *Guinea*, but it will be conſiderable in no other Land, but the South of *Africa*.

V. The fifth and laſt, is a ſmall Eclipſe of the Sun, on *December* 27th in the Afternoon, it falls wholly in the South *Terra incognita*, and where greateſt can be but 4 digits Eclipſed, and that in the Latitude of 64 South, and Longitude 122 Eaſt from *London*: The moſt Northerly places it reaches, will be 37 and a half South, and 65 degrees Eaſt from *London*, about the Iſland of St. *Paul*, at the ſetting of the Sun.

We have not room to inſert the Schemes of the ☉ Ingreſs into the Cardinal Points this Year, it being otherwiſe taken up; nevertheleſs, we will give you the times thereof according to *Aſtronomia Carolina*, which is as followeth.

☉ in ♈, *March* 9 day, 3 h. 11 m. 33 Sec. P. M. T. A. M C. ♉ 20 Aſc. ♍ 0. 13 ♄ ☌ 11. 38. ☿ ♉ 15. 3. ♂ 28 53. ♊ 29. 18 ♈. ♀ 6 6 ♓. ☽ 18 39 ♈. ⊕ 18 52 ♍. ☊ ♒ 17 46.

☉ in ♋, *June* 10 day, 4 h. 17. m. P. M. M C. ♍ 2. Aſc. ♏ 14. 49. ♄ ☌ 5 ℞. ☿ ♊ 6. ♂ ♌ 19. ♀ ♌ 15 ☿ ♋ 17 ℞ ☽ ♍ 18. ⊕ ♒ 3. ☊ ♒ 13.

☉ in ♎, *Sept.* 11 day, 17 h. 51 m. 32 Sec. P. M. M C. ♊ 28. Aſc. ♍ 28. ♄ ☌ 7. ☿ ♊ 21. ♂ ♎ 18. ♀ ♍ 5. ℞. ☿ ♎ 26 ☽ ♒ 25 ⊕ ♒ 24. ☊ ♒ 8.

A Catalogue of the Eclipses of *Jupiter*'s Satellites Visible under the Meridian of the Observatory, or near it, in the Year 1692.

| January | | |

The foregoing Table continued.

October			Satell.		D.	H.	′	Satell.		D.	H.	′	Satell.

30	06	03	1	i.	25	19	03	1	i.		15	49	1	e.
31	09	35	2	i.	27	13	31	1	i.	21	04	52	3	e.
					29	10	16	1	e.		10	17	1	e.
Novemb						17	01	3	e.	23	19	32	2	e.
4	13	29	1	i.						24	04	45	1	e.
6	08	56	1	i.	Decemb.					27	08	49	2	e.
7	12	11	2	i.	2	11	53	2	e.		17	41	1	e.
11	15	20	1	i.	4	17	38	1	e.	28	08	50	3	e.
13	04	26	4	e.	6	12	06	1	e.	29	12	05	1	e.
	09	48	1	i.		20	57	3	e.	31	05	47	1	e.
14	14	44	2	i.	8	06	34	1	e.					

Note, that i. stands for Immersion, or the beginning, and e for Emersion, or the end of the Total Eclipse of any Satellit; The number added shews which Satellit it is. Thus the first Line *Jan.* 3. 9h 14′, 2 e. shews that on the third of *January*, at 9h 14′. the second Satellit, or the next but one to *Jupiter*'s Body emerges from his Shadow: and the next Line, 10h 45′, 1 e. that the same Night, at 10h 45′ the first or innermost Satellit also comes out of his Shadow, and its Total Eclipse then ends.

ADVERTISEMENT.

MOrals, Precepts, Fancies, and Tales, on a new Pack of Playing Cards, containing Sober Morals, *Diamonds*; useful Precepts, *Hearts*; Pleasant Fancies, *Spades*; Pithy Tales, *Clubbs*: with delightful Figures to humour the Merry and Wise, &c. Sold by Mr *Warner* at the *King's Arms* and *Globe* in *New-street*, near *Fetter-Lane*, *London*. Price One Shilling the Pack, but Retailers, and Country Chapmen are considered with Allowance.

OBSERVATIONS:

ON the 30th of this Month, 1648. King *CHARLES* the *First*, of ever Blessed Memory, was, by his own Subjects [A Nest of Religious Cut-Throats] Murthered before his own Palace Gate at *Whitehall*.

Here Treasons a-la-mode in Riddles lye.
A King turn'd Traytour to his Royalty.
Poor Charles *against himself arraign'd for Treason;*
Cast and Condemn'd against both Law and Reason.
Three Kingdoms were the Body, He the Head;
Self-murther was the Crime; the King lies dead.
Of Earthly Kings it cannot be deny'd,
He was the first that for Religion dy'd.
But ah, that Time cannot wear out the Story,
Our Loss, Disgrace, but his Immortal Glory.

OBSERVATIONS.

THis Month is usher'd in with an Eclipse of the ☉ in ♒; it is below the Horizon, therefore not visible to us in *England*, by consequence it cannot affect the People of these Nations; but to the more remote and Eastern Parts of the World, in whose Horoscope it will rise eclipsed, and to those places subject to the sign wherein the defect happens, *viz. Tartary, Muscovia, Russia, &c.* and happening in the Airy Triplicity, it presages Storms, Tempests, and Hurricanes.

On the 6*th.* of this Month, 1685. *Charles* II. departed this life, at which time his only Brother *James* II. became our lawful King, who irritated by Jesuitical, pernicious Counsel; and deluded by Phanatical Addresses, soon lost the Hearts of his People; whereby the Government became unsafe, which he Abdicated in December, and on the 13th. instant, 1688. Their present Majesties K. William and Queen Mary were proclaimed King and Queen of England and Ireland, whom God preserve to be a Nursing Father and Mother to the Nations under Their Protection.

OBSERVATIONS.

ABout the middle of the laſt Month there happened a □ of ☉ and ♄, which having not room to ſpeak to there, we ſhall in this. This poſition infuſes and animates an Old diſcontented Tribe to murmuring and repining againſt the actions of thoſe that ſit at the Helm of Government, tho' they take all the care imaginable for us and our preſervation; and beſtow the amiable Beams of their Favour, thinking to retrieve them by their Lenity and Bounty; and with an Eye of Compaſſion (for doth not ♅ ✱ ☉) ſcorn to look on their failings and ungratefulneſs. But let not ſuch always flatter themſelves with Deliriums of their Brain; tho' Patience be a Vertue, yet it will not always be abuſed: Learn therefore to be wiſe in time.

OBSERVATIONS.

☉ *Jupiter* and *Venus* in Conjunction in *Taurus*: the Dignities of *Venus* raise and advance an eminent Female to some considerable Place of Honour, or some Honourable Marriage celebrated near these times. Others again are liable to the Frowns of Fate; their Honour stain'd; and Credit lies a bleeding; for doth not *Saturn* oppose ♀ with his malefick Beams? Some honourable Embassy likewise made this Month. We hope it may be for Peace; if so, we wish it may take effect, and yet we doubt it; for doth not old *Chronus* frown on the Messenger *Mercury*. We heartily wish that no old States-man lie *incognito*, like a Serpent with a sting in the Grass, unsuspected or undreaded of. He's a cunning, crafty old Blade.

OBSERVATIONS.

MArs this Month is no less than three times careſs'd by the friendly Aſpects of the Superiour and Commanding Planets; viz. ✶ ♃ ♂. ✶ ☉ ♂. and △ ♄ ♂. and at the ſame time ♂ leaves ♋ wherein he was debilitated, and enters ♌ a ſign of his own nature. The Soldier appears glorious and triumphant; he is reſpected and honoured by his Superiours; and where-ever he makes his approaches, He faces the Enemy with boldneſs; invades their Territories, and in ſhort time we may hear of Towns and Cities beſieged. Active Generals and Commanders now make quick work where they come. ——In the midſt of theſe Martial Actions ☉ oppoſes ♄, it is from ♊ and ☿, we fear a ſickly time at *London*. Many Elderly Perſons ſubmit to the Grave; amongſt which are ſome of no mean Quality.

OBSERVATIONS.

IN Commemoration of those 7 Fathers of the *Church* of *England*, viz. *William* Lord Archbish. of *Cant. William* Lord Bp. of St. *Asaph*, *Francis* Lord Bp. of *Ely*, *John* Lord Bp. of *Chichester*, *Thomas* Lord Bp. of *Bath* and *Wells*, *Thomas* Lord Bp. of *Peterborough*, *Jonathan* Lord Bp. of *Bristol*, whose stedfastness to the Truth they profess'd, and opposing the Current of Tyranny and Popery, that then prevailed, were sent to the *Tower*, the 8th. of this Month, 1688. and tryed the 29th following. The Jury, like Men of Honour, were diligent in their Charge, enquiring into every Particle of what was alledg'd against them; who being lock'd up all night without any Sustenance or Refreshment, the next day, to their Eternal Fame, declared them, Not Guilty, to the exceeding Joy, and Satisfaction of all good Protestants and true *Englishmen*.

OBSERVATIONS.

TOwards the end of the last, and the beginning of this Month, poor ♀ is sufficiently afflicted by the malic Aspects of the rest of the Erratick. First, ☌ ☌ and □ ♄ Geocen. also □ ☿. ☌ ♅. and ☌ ♄ Heliocent. and ♀ in ♍ her fall; this denotes Trouble, Sorrow, and Grief, &c. to the fair Sex; that many of them may be deluded by Love's Embraces, to the committing of that which at 9. Months end they would willingly conceal; we therefore would wish them very cautious in trusting Verbal Promises; which the poisonous Aspects of ♄ and ♅ will render like trusting to a broken Reed; and the little Foot-Post ☿ will be very ready to proclaim their failings to the World: Be wise, and take warning.

The Superiours have lately opposed each other; the Effects will not soon be over; the Soldiers have not yet learn'd to beat their Spears into Pruning-hooks, nor their Swords into Plough-shares. The angry Squares of the starry Sky do also dart their angry Beams at each other.

OBSERVATIONS.

From the Positions spoken of in the last Month, Battles, Slaughters, Burning of Towns and Depopulating Countries is thereby ushered into the World. *France*, look to thy self; for if ♋ be thy Ascendant, as some are of Opinion, then may'st thou have thy share in the Effects of it; and the same Cup thou hast given to others, thou may'st be forc'd to drink of thy self.

Note, The Press being hurried, there happened, in part of the Impression, an omission of ♂ in the Nativity aforegoing, which you are desired to insert in the 5*th*. in ♎ 25. 8. ☽. Also in the Demonstration of the Eclipse on *August* 2. instead of *Crusing the* Ethiopick *Ocean*, read, *Crossing*, &c. Likewise mis-pointings in several places, which the Reader is desired to correct and amend with his Pen. As also in the second Eclipse, *Feb.* 7 line 11. read 27. *degrees and a half of Longitude.*

OBSERVATIONS.

September is ushered in with a Square of *Sol* and *Jove* who is posted in *Gemini*, wherein he receives eminent; some eminent Person of the long Robe under the frowns of him. ☿'s willing to lend him a helping hand; But alas, he soon falls stationary to Retrogradation, who is immediately conjoyned to ♂ in ♎ wherein he is debilitated, they are in opposition to the tutelary Sign of our Nation of *England*. *God* preserve us from *Plot* or other mischievous Designs; some busy Brains are very active to foment and promote discontent; many lies spread; much fraud, dissimulation and knavery is promoted and acted in the world for *Stilbon*; in conjunction with *Mars*, can do such feats to the purpose. We wish well to the Island of *Jamaica*, for if ♎ be their Horoscope, it cannot be of pleasant consequence to that People.

The Heliocentrick Aspects.

OBSERVATIONS.

Mercury in the last Month conjoin'd with ♂ in ♎ a Cardinal Sign, and applying to ☉ by Retrograde Motion; the one in his detriment, the other in his fall. A hopeful World, and like to be well managed where such Sparks have the ordering of it. *Storms*, *Tempests*, and *Shipwracks* are the Consequences of such Positions. *Jupiter* is become Retrograde, and thereby is making his application to the *Earth*, to distil his benevolent Rays upon us. *Erycina* seems comformable likewise to lend a helping hand; But alas, What shall we say, or what can be done, when Old *Chronus*, by his opposite Beams Heliocentrick, bids defiance to, and darts his angry Atomes at them both. O *Jove*, let's invoke thee to keep and preserve *Gemini*, with all the places signified by it, from the poisonous sting of *Saturn*'s Malice.

OBSERVATIONS:

A Rough and turbulent Month in earnest, and many Persons find it the Fall of the Leaf, as well as the Melancholy Trees ☽ Three Planets swift in motion, change their Signs this Month; two of them for the worse; the World seems in a hurry; a removal of many inferiour Officers in several Courts and Cities, it may be for Knaveries too broad to be winked at: Much News arrives now from *Ireland* and other Parts Westward. *Mrs* opposes the *Earth* by Heliocentrick Position. Some rash Actions now committed by many head-strong and passionate People: the Weather grows cold, and Charity grows colder. We know not how to bear with one another's weaknesses; well, these Hurly-burlies will over, *Jove*, *Terra* and *Venus* begin to combine together.

The true Declination of the Sun.

OBSERVATIONS. 'Tis a Turbulent beginning with a witness; the superiour ☌ ♄ and ♂ in ♂ Geocentrick and Heliocentrick; *Mars* and ☉ in Oppositiòn, and *Saturn* and ☉ in like Aspect. ♃ in a humane ☌ *Saturn* and *Mars* in Bestial ☍. The Afflictions of these Positions are likely to befal both Man and Beast. We well remember the Commotions, Wars and Slaughter there were, when they last opposed each other: the Season of the Year is not fit for action, yet methinks the Souldiery are in a stir; for ♂ and ♄ in a fiery ☌ should put them to some hare-brain'd Action. The great Congress of the Planets Heliocentrical in the middle of the Month denotes some Prodigious Business in agitation: The ☾ Eclipsed in ♈, which is far enough from us in *England*; *Ergo*, it concerns us not in any wise, for which let's sing *Te Deum Laudamus*.

ADVERTISEMENTS.

Did in my last Years *Ephemeris*, at the request of several of my good Friends, give an Advertisement of my composing *Ephemerides* for seven Years to come by way of Subscription to be calculated (*de novo*) from the *Caroline* Tables with the *Eclipses* and other requisites proper for such a work, which every Subscriber should have in sheets at 5 *s.* 6 *d.* a Book; nothing is required till the Book be ready for the press, (of which time they shall have notice,) then half; the other part to be paid at the delivery of the Book. Now these are to give notice that the number of Subscribers being as yet but few, not answering the Charge of such a work: All Gentlemen and others, that are willing to encourage so elaborate and useful a Book, are requested to send their Names and Places of abode to the Author, as is directed at the end of the Preface; otherwise the work will be laid by and not go forward.

Did also in my said last Years *Ephemeris* for want of room, insert an abrupt Advertisement of a name-sake of mine, *viz.* Mr. *Edw. Parker*: Now lest some ill disposed persons should misinterpret my then Advertisement, I shall further explain my self, That I understood by Mr. *Coley*, that my said name-sake had proposed the Calculation of a 20 Years *Ephemerides*, which my self had also under consideration, was willing, and am still, to have communication with him thereon: But understanding that he is, or was then at Sea, and not knowing how to send to him when he doth return: These are therefore to inform him, (if any hap to come to his hands) that a line or two would be very acceptable from him to his Friend and Name-sake the Author hereof.

Pillula *Cephalica*; or a *Cephalick Pill*: Being admirable advantageous to the *Scurvy*, *Stone*, and *Gout*, as hath been well experienced by several credible Persons, that have made use thereof by *J. Blanchard* Student in *Physick* and *Surgery*, in *Virginia-Row*, the back-side of *Shoreditch*, leading to *Hackney*, the first House next Fields. He hath great success in the cure of the *Dropsie*, *Consumptions*, *Coughs*, *Catarrhs*, *Head-Aches* of all sorts, and the *Venereal Diseases*, if taken in time. There

THere is now in the Press, and will be speedily publish'd a very useful Copy Book, Entituled, *A COMPOSE NUMBER OF COPIES*, with printed Directions thereto, that are so Plain and Easy, that any *Person* with Care may quickly attain to *Write* intelligibly well the now most used *Hand* used in *England*. It being intended by the *Author* for those that want either the Conveniency of much *Time*, or the Assistance of *Friends*, especially *Those* that live in places distant from *Cities* and *Great Towns* where a *Teacher's* Assistance cannot be had. *Price 6 d.* To be Sold by Mr. *William Becket* at his Picture-Shop under the *North*-side of the *Royal Exchange*. By Mr. *Charles Holman* (who maketh the *London* Ink-powder by Records) at the *Hare* near St. *Margarets*-Hill in *Southwark*. And by Mr. *Sutton Sharp* Needle-maker, at the Gate in *Cross Lane*, *London*; And by most Booksellers; Where all persons may have occasion for them may be Furnished.

You are desired to recommend it to your Friends for their, and their Childrens good.

DIOPTRICA NOVA. A Treatise of *Dioptricks*, in two Parts. Wherein the various Effects and Appearances of *Spherick Glasses*, both Convex and Concave, Single and Combined, in *Telescopes* and *Microscopes*. together with their usefulness in many concerns of Humane Life, are explained. By *William Mollyneux* of *Dublin* Esq; Fellow of the *Royal Society*. Printed for *Benjamin Took*, 1692.

BUCKWORTH's LOZENGES Famous for the cure of *Coughs*, *Colds*, *Catarrhs*, *Hoarseness*, &c. Being also a great Cordial and Sovereign Preservative against all contagious Distempers, malignant Air, and unwholesome Weather; well approved of by the chief *Physicians* of the Colledge, to whom the true Receipt hath been communicated by the Publisher hereof. They are now rightly prepared only by *James Shipton* Apothecary, at the *Crown* in *Hatton-Garden*.

FINIS.
